Children's brains have a massive growth spurt when they're very young. By the time they're six, their brains are already about 90-95% of adult size. But the brain still needs a lot of remodelling before it can function as an adult brain. This brain remodelling happens intensively during adolescence, continuing into your child's mid-20s.

Adolescent Brain Brain Awareness Brain Institute OHSU

It is now commonly believed that the brain of an adolescent is much more dynamic than previously thought. The changing physical features that are obvious on the outside of an adolescent are also taking place inside their brain. At various times during childhood and into adolescence, new synapses are made and then pared down, producing more mature brain structures.
