What is the Computer Vision API docs microsoft com

Computer Vision first generates a high-quality thumbnail and then analyzes the objects within the image to determine the area of interest. Computer Vision then crops the image to fit the requirements of the area of interest. The generated thumbnail can be presented using an aspect ratio that is different from the aspect ratio of the original image, depending on your needs.

Computer vision Microsoft Research

Computer vision is multidisciplinary, routinely serving visual processing and analytic components to ambitious projects such as the development of personal robots, self-driving cars and autonomous drones. Artificial intelligence and machine learning are widely embraced in efforts to automate computer vision tasks such as 3D recovery, facial and object recognition, image and video captioning, biometric security, medical imaging and video enhancement.

Computer vision Wikipedia

Computer vision includes 3D analysis from 2D images. This analyzes the 3D scene projected onto one or several images, e.g., how to reconstruct structure or other information about the 3D scene from one or several images. Computer vision often relies on more or less complex assumptions about the scene depicted in an image.

Tutorial Build an image processing app C Computer

Unlike the other scenarios included in the Computer Vision sample app, this scenario is asynchronous, in that one method is called to start the process, but a different method is called to check on the status and return the results of that process. The logical flow in this scenario is

somewhat different from that in the other scenarios.
