### **COLD CRACKING OF WELDS Sodel**

PHENOMENA AND TYPES OF CRACKING From a metallurgical standpoint, weld cracks can be classified in two categories: cold cracks and hot cracks. Differentiating between these cracks requires recognizing where they occur on one hand and when they appear on the other hand. Hot cracking or solidification cracking appears during the last phase of solidification before the weld metal becomes

### **Weld Cracking Lincoln Electric Global Sites**

Weld Cracking Several types of discontinuities may occur in welds or heat affected zones. Welds may contain porosity, slag inclusions or cracks. Of the three, cracks are by far the most detrimental. Whereas there are

acceptable limits for slag inclusions and porosity in welds, cracks are never acceptable. Cracks in a weld, or in the vicinity of a weld, indicate that one or more problems exist
