Numerical Methods 1 0 Problem set up

Figure 0a, taken from a very famous paper on this subject [1], shows the so-called interface problem between the differential and algebraic equations of the DAS. This problem refers to the need to solve both the ODEs of the system (on the left of Fig. 0a) as well as the algebraic equations of the system (on the right of Fig. 0a). Fig. 0a In general, there are two classes of methods for
