## Bladder Cancer - Treatment for Stage 0 - HTQ

The long-term outlook for stage 0is (flat non-invasive) bladder cancer is not quite as good as for stage 0a cancers. These cancers have a higher risk of coming back, and may return as a more serious cancer that is growing into deeper layers of the bladder or has spread to other tissues.

2003b), the highest proportions of these deaths being caused by work-related cancers, circulatory and cerebrovascular diseases, and some communicable diseases. The overall annual rate of occupational accidents, [Bladder - BC Cancer](#)

Industrial and occupational exposures are thought to account for a significant proportion of bladder cancers among males. Workers exposed to 2-naphthylamine and benzidine have a 2-4 fold increased risk of bladder cancer, with risk residing mainly in those with high or prolonged exposure. Antioxidants containing 2-naphthylamine are used chiefly in the rubber industry. Leather workers and [Occupational risk factors for testicular cancer: a ...](#) Methods: All 348 testicular cancer cases with available gainful occupational information registered between 2000 and 2005; as well as 564 suitable controls (from a pool of other cancers) were drawn from the Cancer Registry of Rhineland-Palatinate. Unconditional logistic regression was used to compute odds ratios (OR) and associated 95% confidence intervals (CI).

Stage 0 is divided into stages 0a and 0is, depending on the type of tumor. Stage 0a is also called noninvasive papillary carcinoma, which may look like long, thin growths growing from the lining of the bladder. Stage 0is is also called carcinoma in situ, which is a flat tumor on the tissue lining the inside of the bladder.

### **Bladder Cancer: Treatments by Stage | Cancer.Net**

Noninvasive and non-muscle-invasive bladder cancer (stages 0a, 0is, and I) People with noninvasive bladder cancer (stage 0a) that is low grade are treated with TURBT first. Low-grade noninvasive bladder cancer rarely turns into aggressive or metastatic disease, but patients are at risk for developing more low-grade cancers throughout their life.
