[Rhinovirus - Wikipedia](#)

The rhinovirus (from the Greek *rhis* "nose", gen *rhinos* "of the nose", and the Latin *virus*) is the most common viral infectious agent in humans and is the predominant cause of the common cold.

[Rhinovirus \(RV\) Infection \(Common Cold\): Practice ...](#)  
Rhinoviruses (RVs) chiefly cause upper respiratory tract infections (URTIs), but may also infect the lower respiratory tract. Rhinoviruses are the most common cause of the common cold. Although rhinovirus infections occur year-round, the incidence is highest in the fall and the spring (see the image).
