Replacement of the Temporomandibular Joint Oral Health Group

For prosthetic total joint replacement it is necessary to open the joint with a preauricular approach for placement of the fossa component (Figure 1). It is also necessary to use a sub- or retro-mandibular approach for placement of the condylar portion (Figure 2). In contrast, when a rib graft is placed, there is obviously a need for a chest incision and it is usually the 5 th or 6 th rib that
